

May 2016

smp aviation and **Thuraya** are pleased to announce the introduction of **Thuraya Aero** in partnership with the Aero Group, namely:

	antenna system
	aeronautical modem
	software defined radio

The partnership's goal is to provide airborne satellite communication on a robust and flexible network to deliver considerable operational cost savings and affordable as well as calculable airtime costs. With negligible installation expenses and easy conversion of existing L-band systems, Thuraya Aero is set to offer an exciting and attractive alternative to anything currently available on the market. Hardware and software components are being developed in partnership with the Aero Group.

This powerful combination of well-known aerospace solution suppliers has already secured all necessary aero-approvals to offer these high class products to the aeronautical market. Preliminary system flights have been completed successfully. Watch our maiden flight now, as we put the innovative components to the test.

<http://www.smp-aviation.com/downloads>

This incomparable, state-of-the-art technology is set to be commercially available in the second quarter of 2017. An extensive range of airtime packages will be offered, alongside 24/7 hotlines for customer support. The airborne system will include all necessary hardware and software, with expert local service partners for each market.

Advantages compared to existing systems:

- lowest cost of ownership
- significant operational cost savings
- robust, flexible network
- easy conversion of existing L-Band systems
- negligible reinstallation costs

Information about Thuraya and smp aviation:

Thuraya Telecommunications Company is one of the world's leading mobile satellite services (MSS) operators. It owns and operates two geo-stationary (GEO) satellites, and the Thuraya network covers two thirds of the globe and 161 countries. Thuraya covers the rest of the world by global system for mobile (GSM) roaming. Its customers come from a variety of sectors, including government and NGOs, maritime, energy, and media.

smp aviation has been chosen as general contractor and exclusive partner by **Thuraya** to create and launch its innovative aero products. **smp aviation** specializes in providing security (and security-related) solutions to organizations such as armed forces, police, civil protection, coast guard, search & rescue and many other agencies. **smp aviation** has delivered services both to governmental organizations and non-governmental clients for more than two decades. The dedicated **smp aviation** team of experts has extensive experience in military and paramilitary project management and works in cooperative partnerships across sales, marketing, logistics, after sales support and services.
